

MOBILE CMMS - MC Express

SAVE TIME BY ACCESSING THE RIGHT INFORMATION, WHEN AND WHERE YOU NEED IT

- Avoid extra trips back to the office. Eliminate the need for print-outs. Reduce waste. With MC Express, your technicians can quickly access information from their iPad, Android tablet or other mobile device.
- Receive work orders instantly. Record time and materials. Wrap it up and move on. MC Express allows your technicians to complete work orders from the field.
- Increase labor productivity. Technicians can access work orders, view attached documents and files, and upload photos with a mobile phone or tablet device, all from the field.

INCREASE PRODUCTIVITY AND LABOR EFFECTIVENESS

- Improve the utilization of your most important asset: your mechanics. Using a smart device, your team can access the CMMS remotely, bringing up productivity and the percent of labor-hour utilization.
- Effectively measure maintenance performance and service with more precise tracking of repair information, such as craft labor productivity, through the use of MC Express, on location.
- Hold your field technicians more accountable of hours spent on maintenance requests. Utilize MC Express start/stop clock functionality to log wrench time.

MOBILE CMMS

Mobile CMMS equips technicians with the ability to create, update, and complete work orders from the field. Reduce work order completion times with access to asset and equipment details on any mobile device. Improve efficiency via automatic recording of time and materials.

IMPROVE THE COLLECTION AND DISTRIBUTION OF INFORMATION

- Free from turbulence, MC Express streamlines communication within your department with assignment notifications, real-time status updates and more.
- Protect yourself and your organization with accurate and up-to-date documentation of work. With MC Express, you can capture photos of the repair, on location, to provide proof of fixes if/when necessary.
- Keep all stakeholders informed of progress. With updates to work records from the field, you get better tracking and greater visibility of maintenance being performed.

"I love MC Express and how easy it is to use. With the mobile units you can complete work orders from the field in a very short time, and it all goes directly into the database to be recalled whenever needed."
